

BLOOD BLOOD BLOOD,AND MORE BLOOD.

What of the import of blood ?

Looking at the presence of , and, importance of blood in such matter's as National Socialism, race and paganism (okkultism, satanism,genetiks etc.)

Are we to believe the true National Socialists, being a mystical order, actually promoted something so banal as mere materialistik racial eugeniks?

The true thrust behind N.S and blood purity is indeed a mystikle teaching. True hidden accounts attest to this. The simple fact of the matter is that the more one advances in spiritual evolvment, the purer one becomes. Thus , we must keep the blood pure.

As the further one advances the purer the information carried by the blood becomes.

Just as it was in the days of old, so it will be again.

In the past, man was vibrationally intune with the goddess. He used stone to vibrationally and essence-wise , store knowledge and “vibe”. When we emphatically re-tune ourselves to the goddess, we will find that this knowledge will be accessable to the individual, and, folk.

This transaction will be a two way process. With us nourishing earth and earth nourishing us.

A vital element to the role of noble (Aryan) guardians of Earth and all it's inhabitants we've for a long time neglected.

This knowledge passes from stone (earth) to bone, where the blood is manufactured, and, thence to the rest of the human form. Of course this is a mystical/magicle account. To which empiracle science will not attest to for some time yet.

The cosmos is alive. Earth's alive, for now..... just. Let's be radiant.

The pure blood of National Socialism, is to be taken in another way again.

For one to evolve spiritually to a higher realm. A higher “self”. A purer BEING . One has to exterminate the ego's , free oneself from these psyckik aggregates, that have accumulated and attached themselves to the being over a succession of incarnations. Causing a form of possesion (a degeneration), of multiple “people” inhabiting

the psyche, that must be reduced to cosmik dust to reach a state of Jungian “individuation”.

One way to achieve this is through oxygenation, which assists in the result of blood purification. Earth, or rather, “the elementals” assist us in this work as we ingest blood purifying herbs etc.

The real work of course is done in profound meditation. Here we can truly self observe and confront the ego’s , and strive for liberation.
